

Dark Fiber

Own It. Run It. Control Everything.

Build a private network no one else touches.

Boundless
Bandwidth

Flexible
Topologies

Private and
Secure

Utility-Grade
Reliability

Why share your network with strangers? DQE Dark Fiber gives you full control with a private path that's all yours — no shared circuits, no compromises.

IT leaders don't get second chances. That's why we build fiber no one else touches — and respond like your job depends on it.

Better Dark Fiber from DQE

- **No Limits. Ever.** — Scale to AI, imaging, analytics — whatever's next — without hitting bandwidth ceilings.
- **Flexible Design Options** — Build your network your way — point-to-point, rings, protected paths — and evolve as you grow.
- **Technology-Neutral Infrastructure** — You choose the gear. You operate the protocols. You run the applications. No carrier limitations.
- **Private and Secure** — Keep your data on a path reserved exclusively for your business, free from shared circuits or public internet exposure.
- **Engineered for Performance** — Count on fiber rings built for any contingency and monitored 24/7/365 by local DQE teams.
- **Rapid Restoration** — When fiber fails, our team's already moving. No call center. Just real people, right here, fixing it fast.

Built for Big Bandwidth. Ready When You Are.

CARRIERS AND HYPERSCALERS

Direct, diverse paths to 27 data centers. No delays. No congestion.

DATA CENTERS AND CLOUD BUILDERS

Pre-built diversity between key data centers — so you can connect now, not wait months.

GOVERNMENT AND EDUCATION

Future-ready fiber for smart cities, university research, and critical E-Rate programs.

ENTERPRISES WITH EXTREME DATA DEMANDS

Built for high-stakes sectors — manufacturing, healthcare, finance — where downtime isn't an option.

Tested. Trusted. Reliably Reliable.™

- 100% DQE-owned backbone with diverse paths engineered for resilience. You design the failover — we provide the foundation.
- 5,000+ route miles, 3,350+ on-net buildings, and deep reach across key business parks and data centers you care about.
- Plug straight into AWS, Azure, Google Cloud, and top regional hubs — no middleman.

Why DQE

Not the Biggest. Just the Most Responsive.

DQE's infrastructure was purpose-built for nonstop uptime. Today, it powers the region's most demanding dark fiber deployments — supported by engineers who live and work where you do.
